Executive Summary

- I have 33 years of experience in Programming and Design. My main focus in the last 17 years has been Web Application Development and Engineering. I specialize and concentrate my expertise on Microsoft Technologies such as the .Net Framework, ASP.Net, MVC3, ORMs, Entity Framework and C#. These are partnered with standard web based tools and languages such as HTML, Javascript, CSS and a myriad of tools and technologies.
- I have served in the roles of Dept Manager, Project Manager, Senior Developer as well as team member in many different companies as employee as well as contractor.
- I am seeking contract work or part time w2 projects and am willing to commit to long-term and short-term projects.
- Excellent communication, problem solving and inter-personal skills.

Professional Experience

Integrated Software Systems / Hitech Solutions Principal, President/CEO

March 1981-Present

I started this business in 1981 where I began my career as a partner with my brother as a Programmer/Consultant working on Mainframe Computers using languages like COBOL & RPGII.

eCommerce Web Applications and software development.
- **Dr. Ethan Etnyre, Dr. Karen Makuni,** 805-349-7843
Website Programming and IT Consulting

American Eagle Airlines

May 1983 – June 1998

Manager of IT and Software Development. Responsible for software development and managing programmers for over 15 years. During that time we migrated the operations from a Mainframe Computer and classic COBOL & RPG applications to Windows Servers and Desktop Computers connected over a large Ethernet network infrastructure. Old systems that were written and developed in the 70s were replaced and rewritten in modern programming languages utilizing event driven, object oriented standards.

Responsibilities & Skills

- Manage Software Developers and IT Staff, reporting to the Vice President of Finance and a key player in the Middle Management Team that helped run the airline.
- Design Databases, Business Logic and Applications.
- Install and Maintain Local Area Networks including Cat-5 Cabling, Patch Panels, Routers, Hubs and Switches; Windows Based Servers and Workstations including hardware troubleshooting and repair, OS installation and all software installation, support and training.
- Manage and maintain Mainframe Computers as well as 5 Windows Servers and over 100 Desktop and notebook computers.
