Executive Summary

- 36 years of experience in Programming and Design. My main focus in the last 20 years has been Web Application Development and Engineering. I specialize and concentrate my expertise on Microsoft Technologies such as the .Net Framework, ASP.Net, MVC, ORMs and C#. These are partnered with standard web based tools and languages such as HTML, Javascript, JQuery, CSS and a myriad of tools and technologies.
- Served in the roles of Dept Manager, Project Manager, Senior Developer as well as team member in many different companies as employee as well as contractor.
- I am seeking contract work or part time w2 projects and am willing to commit to long-term and short-term projects.
- Excellent communication, problem solving and inter-personal skills.

Professional Experience

Integrated Software Systems / Hitech Solutions

March 1981-Present

Principal, President/CEO

Started this business in 1981 where I began my career as a partner with my brother as a Programmer/Consultant working on Mainframe Computers using languages like COBOL & RPGII. I kept the consulting business running ever since with the exception of a short hiatus, 15 years, working for the AE Airlines where I started as a consultant and moved to San Luis Obispo with my family and the company to run their IT Department.

Responsibilities & Skills

- Application Development/Programming, Database Design, Project Management.
- Programming languages, tools and technologies: Visual Studio 2010, C#.NET, VB.NET, ASP.Net, MVC, Razor, ASPX Forms, ORMs, Entity Framework, HTML, Cascading Style Sheets, Javascript, JQuery, Classic ASP, PHP, VBScript, MSSQL, T-SQL, DHTML, Photoshop, Illustrator etc..
- We also support Network and Server Engineering, Design and Implementation of which I am also highly skilled.
- Manage all Executive processes involved in running the corporation.

Recent Clients

- **Viatour Software.** Karen Ziegler, Co-President, (505) 466-6300
Web Application Development for MyAccount and Reservation Intranet Application
- **Santa Barbara Mass Transit District,** Tom Sheldon, IT Manager, (805) 963-3364
Web Applications and software development.
- **Dr. Ethan Etnyre, Dr. Karen Makuni,** (805) 739-3561
Website Programming and IT Consulting

American Eagle Airlines

May 1983 – June 1998

Manager of IT and Software Development. Responsible for software development and managing programmers for over 15 years. During that time we migrated the operations from a Mainframe Computer and classic COBOL & RPG applications to Windows Servers and Desktop Computers connected over a large Ethernet network infrastructure. Old systems that were written and developed in the 70s were replaced and rewritten in modern programming languages utilizing event driven, object oriented standards.

Responsibilities & Skills

- Manage Software Developers and IT Staff, reporting to the Vice President of Finance and a key player in the Middle Management Team that helped run the airline.
- Design Databases, Business Logic and Applications.
- Manage all aspects of the Network & Computer Infrastructure including Mainframe Computers, Windows Servers and 100s of Desktop and notebook computers.
